

<select> ... </select>

The HTML <select> element represents a control that provides a menu of options

<textarea> ... </textarea>

The HTML <textarea> element represents a multi-line plain-text editing control, useful when you want to allow users to enter a sizeable amount of free-form text, for example a comment on a review or feedback form.

Example:

```
<form action="" method="get" class="form-example">
  <div class="form-example">
    <label for="name">Enter your name: </label>
    <input type="text" name="name" id="name" required>
  </div>
  <div class="form-example">
    <label for="email">Enter your email: </label>
    <input type="email" name="email" id="email" required>
  </div>
  <div class="form-example">
    <input type="submit" value="Subscribe!">
  </div>
</form>
```

Interactive elements

<details> ... </details>

The HTML Details Element (<details>) creates a disclosure widget in which information is visible only when the widget is toggled into an "open" state.

<summary> ... </summary>

The HTML Disclosure Summary element (<summary>) element specifies a summary, caption, or legend for a <details> element's disclosure box.

Example:

```
<details>
  <summary>Details</summary>
  Something small enough to escape casual notice.
</details>
```
