

Forms

`<form> </form>`

Defines a form

`<select multiple name=? size=?> </select>`

Creates a scrolling menu. Size sets the number of menu items visible before user needs to scroll.

`<select name=?> </select>`

Creates a pulldown menu

`<option>`

Sets off each menu item

`<textarea name=? cols="x" rows="y"> </textarea>`

Creates a text box area. Columns set the width; rows set the height.

`<input type="checkbox" name=? value=?>`

Creates a checkbox.

`<input type="checkbox" name=? value=? checked>`

Creates a checkbox which is pre-checked.

`<input type="radio" name=? value=?>`

Creates a radio button.

`<input type="radio" name=? value=? checked>`

Creates a radio button which is pre-checked.

`<input type="text" name=? size=?>`

Creates a one-line text area. Size sets length, in characters.

`<input type="submit" value=?>`

Creates a submit button. Value sets the text in the submit button.

`<input type="image" name=? src=? border=? alt=?>`

Creates a submit button using an image.

`<input type="reset">`

Creates a reset button

Tables (use only for data layout - use CSS for page layout)

`<table> </table>`

Creates a table

`<tr> </tr>`

Sets off each row in a table

`<td> </td>`

Sets off each cell in a row

`<th> </th>`

Sets off the table header (a normal cell with bold, centered text)

HTML5 input tag attributes

(not all browsers support; visit <http://caniuse.com> for details)

`<input type="email" name=?>`

Sets a single-line textbox for email addresses

`<input type="url" name=?>`

Sets a single-line textbox for URLs

`<input type="number" name=?>`

Sets a single-line textbox for a number

`<input type="range" name=?>`

Sets a single-line text box for a range of numbers

`<input type="date/month/week/time" name=?>`

Sets a single-line text box with a calendar showing the date/month/week/time

`<input type="search" name=?>`

Sets a single-line text box for searching

`<input type="color" name=?>`

Sets a single-line text box for picking a color

Table attributes (only use for email newsletters)

`<table border=?>`

Sets the width of the border around table cells

`<table cellpadding=?>`

Sets amount of space between table cells

`<table cellspacing=?>`

Sets amount of space between a cell's border and its contents

`<table width=?>`

Sets width of the table in pixels or as a percentage

`<tr align=?>`

Sets alignment for cells within the row (left/center/right)

`<td align=?>`

Sets alignment for cells (left/center/right)

`<tr valign=?>`

Sets vertical alignment for cells within the row (top/middle/bottom)

`<td valign=?>`

Sets vertical alignment for cell (top/middle/bottom)

`<td rowspan=?>`

Sets number of rows a cell should span (default=1)

`<td colspan=?>`

Sets number of columns a cell should span

`<td nowrap>`

Prevents lines within a cell from being broken to fit
